# Dimensional Spritzing

Use the Crafter's Workshop  
template TCW155 Daisy Cluster.

Get a rich dimensional look on watercolor paper with modeling paste (molding paste). Apply the paste with a palette knife by scraping a thin layer across the template and onto the paper. ❶ Scrape off any extra paste before it dries. Gently peel back the template from the paper. ❷ Let dry. Moisten the paper with water on the front and back. Now spritz and spray directly onto the paper. Start with the lightest colors and work your way into the darker tones. ❸ Let dry before cutting or pasting items onto the surface.

Your spritzed  
dimensional paper  
can now be used for  
Scrapbook layouts,  
Cards, Gift tags,  
ATC's and more!
