**Corner Punch Rounder – CP6A**  
**Double Sided Foam Squares – 3.3100**  
**Double Sided tape – 3.3190**

### **Method: -**

**Stamp Penguins onto a piece of white card (approx 3” x 2”) and colour in using the small VersaColor Pad, Le Plume11 Pens, and “glitter” with the Ice Stickles. Round the edges with the corner rounder punch.**

**Stamp the Penguins again on a spare piece of white card, and decoupage the left Penguin (mount with double-sided foam squares).**

**Mat and layer this card with the images onto a slightly larger piece of coordinating card, and affix with double sided tape.**

**Cut Swell Noel background paper to fit your Christmas card and use the peel off lines to make a border.**

**Stick the Happy Christmas peel offs onto a small piece of co-co-ordinating card, round the edges with the corner rounder punch. And mount with double sided foam squares.**

### **To make the slider: –**

**Cut a strip of plain white card to the width of your card, and the depth should be approx 1”.**

**Cut two slits (one at each end) wide enough for the ribbon to go through.**

**Thread the ribbon (it needs to be about 12” long) from the rear of the card – across the front – and back through the other end.**

**Mount this strip of card with the ribbon threaded through it, onto your Christmas card (about 2 ½ “from the bottom) - using the double sided tape (make sure not to put the double sided tape over the slits).**

**Put a strip of double sided tape across the rear, and in the middle of the small card with your Penguins on it, and attach this card to the ribbon.**
