

### **SLIDER CARD INSTRUCTIONS**

Take an A4 sheet of stiff cardstock and cut 5" off lengthwise. Now cut two 5" squares from this and keep the long strip as you will use for the extension piece.

Draw a 2cm border all round one square and cut along 3 sides.

Score & fold the fourth side. Fold the flap in half.

Turn a 1 cm hem on the strip of card and attach to the underside of the folded flap.

Add a decorative paper to the centre of the other 5" square.

Punch out a half circle for the finger notch through one edge of the full square and the fold side of the "flap" square.

Use double sided sticky tape to stick the top and bottom squares together along three sides (NOT the side with the finger notch).

Push the extension strip back through the card and trim to fit.

Then take a piece of cardstock roughly 4 ½", mat and layer with decorative cardstock, add your finished image using foam pads.

Here I have used red cardstock along with K & Co Christmas Cheer Speciality paper pad (623101), Christmas Cheer Chipboard "Merry Christmas" (566286), Scribble Snowman from PICS001 Clear Stamp Set and finished off with some snowflakes from K & Co Swell Noel (569232).
